## In Ordering Please Use Our Stock Numbers to Prevent Errors

**PRICES IN THIS CATALOG** cancel all previous lists and quotations and are subject to change without notice. All prices quoted F.O.B. Julian, N. C.

**TERMS**—Cash with order unless credit has been established with us. In this case, account is due in 30 days from date of invoice.

**REPLACING**, we agree to supply once at half list price F.O.B. our shipping point, trees and plants to replace those which may die within one year from date of shipment, from causes other than abuse or neglect or weather conditions, provided the full price as listed herein was paid and if we are notified promptly.

**SIZES.** Trees or Plants marked 3 to 4 ft. means that they will be 3 ft. or over but under 4 ft. In ordering please mark the size you want just like they are marked in this list.

**STOCK** especially selected will be priced according to its value without regard to prices shown here. If trees and plants are sold balled and burlapped, which are usually sold bare root, an extra charge will be made to cover the cost.

A cordial invitation is extended to all to visit our nursery. No service is rendered on Sundays.

**OFFICIAL INSPECTION.** Each shipment is furnished with a certificate that our nurseries have been inspected by the State Entomologist of North Carolina and found to be free from contagious diseases.

**ARE YOU RECEIVING OUR MONTHLY  
LANDSCAPE LETTER?**

Per Doz. .... 3.00

## Asparagus

311. Per 12 ..... 1.50

Per 100 ..... 6.00

## Death Ray Garden Spray

A Self Spreading and Emulsifying Plant  
Spray Concentrate Containing the Active  
Principles of Pyrethrum

Death Ray Garden Spray is a complete, self-spreading and self-emulsifying pyrethrum spray. It is not necessary to add a soap spreader or any other wetter as this is already provided in its composition, it requires only dilution with water by the ultimate user. Death Ray Garden Spray assures good coverage with a maximum and prolonged retention of effective insecticidal material on foliage. Its ingredients are non-poisonous and it may be used safely on foliage, when the customary practices of good horticulture are followed. Death Ray Garden Spray is free-flowing at all times and mixes readily with hot or cold and hard or soft water, yielding an excellent emulsion. Death Ray Garden Spray is standardized, stable, and uniform in its composition. It does not stratify or separate, and has been freed from accumulations of inert waxes, gums, and resins. Death Ray Garden Spray contains 95.5% of active insecticidal ingredients.

Death Ray Garden Spray is recommended primarily for the control of such plant pests as aphids, thrips, leaf hoppers, white flies, mealy bugs, and various plant bugs, and is also applicable in combatting defoliating insects, such as flea beetles, leaf beetles, red spider, Mexican Bean beetles, and injurious larvae where an effective contact insecticide of this type can be used to advantage. Death Ray Garden Spray is well suited to the needs of the truck and market gardener, fruit grower and nurseryman, and the fancier of ornamental flowers and shrubs as well as for the florists and in the greenhouse.

Our post-war Death Ray Garden Spray contains twice the amount of Pyrethrum and at the same time we have added Sesamin, a powerful synergist developed for use with Pyrethrum. All in all, this is a decided improvement over our reliable Death Ray Garden Spray of pre-war days.

1 oz. Concentrate makes up to 12 gals. of spray.

In 1 oz. bottles 35c. Quart \$4.50 Gal. \$13.50
